

ONDABOX – THE COLLAPSIBLE CONTAINER

External dimensions

Internal dimensions

Ondabox is the new collapsible container by Ondaplast. It consists of a pallet and a cover in HDPE injected plastics holding a Polionda® sleeve with horizontal channels, and it is the best solution for every supply chain that uses reusable packaging to transport and protect any product or component, even the most delicate ones, with maximum efficiency.

Ondabox is available in three versions with standard dimensions, or it can be built with custom dimensions to satisfy every possible customer need. Furthermore, its interior can be fitted with any kind of layer pad, dividers, PE foams and textile pockets.

Accessories and options: safety beams for the pallet, document holder, fixing hooks for pallet and cover, openings, digital print.
